

space flight than manned space flight, because I come from the manned space flight advocacy group with the Johnson Space Center and the shuttles that have been going back and forth, but he could explain to each of us the fact that there was value in whatever that we advocated; that science was holistic; that we all should be participating in it.

He could advocate for the space center and he could advocate for the real sciences, the earth sciences, which he was a strong proponent of. He was a person who was able to balance the interests of the members of the Committee on Science in explaining that we had a responsibility to promote this Nation as a world leader in all of the sciences. So this was not just a race to space, of which he had much more history than I would have had, but this was to be able to fulfill our promise and our responsibility in man's creativity with research and experimentation and outreach in the areas of science and physics and other areas that the Committee on Science covered.

I found that he had a wry sense of humor, he had a good sense of humor, he had an enormous sense of humor. And we could always rely upon ranking member Brown, for I did not have the privilege of serving with him as chairman, although that never got the best of him, but he would always, in a moment when it got too serious in our committee, there was ranking member Brown with the appropriate sense of humor to bring us all back to the reality that we are simply mere mortals and this too will pass.

To his family, to his dear family and his dear wife, we thank them in particular for sharing him for all these many years. I thank him particularly for his openness to then freshmen members in the class of 1995, the 104th Congress, the Congress that Democrats were not in control. There was a small class of 13 of us that came in as Democrats, and I was fortunate enough to secure a place on the Committee on Science. Mr. Brown served, even in my lowest ranking position, as a welcoming mentor and a person who was encouraging of the work that we had to do together on the Committee on Science.

I am grateful for his leadership and I was even more grateful to listen to the many colleagues who were able to share some of the wider ranges of George Brown, both his civility, his kindness, his concern about world peace, which I think is most insightful of the kind of man he was, and then to hear in the memorial service his commitment to politics, as Senator BOXER related how he provided her support in a very competitive race.

He was a man of his word. He was a man who showed great love for his Nation and great love for his avocation, which was a love of science and research.

□ 2145

I close simply to say that something very special comes to mind of Mr. Brown, and that is that he was a person that I thought exhibited the concept that all of us aspire to, that we are one human race. Before it became in vogue to talk about one race, maybe to talk about diversity, maybe to talk about openness and equality and opportunity, I could sense that, even though just knowing Mr. Brown starting in my first term of Congress, that he lived his life as being part of one human race. For he lived it on the floor of the House. He lived it in the Committee on Science. And, as I have heard from my colleagues, he has obviously lived it all of his political life.

I am thankful for that. And, for that reason, I owe a debt of gratitude for the fact that he served us and that he served this Nation. We will be forever grateful. Thank you, ranking member Brown, Chairman Brown, for your leadership.

TRIBUTE TO THE LATE GEORGE E. BROWN, JR.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. GOODLING) is recognized for 5 minutes.

Mr. GOODLING. Mr. Speaker, George and I, of course, served here together for 24 years. A more perfect gentleman you would not find. His humor was mentioned by several, and I would have to say that he had the best one-liners and the shortest one-liners that I have ever heard. Usually two or three words and he could crack you up pretty quickly.

But I have to tell my colleagues, George also had everybody in the House of Representatives believing that I have a chronic cold condition. He was on the fourth floor; and, of course, I got on the second floor. And I could smell the elevator coming and I was ready. Because, of course, it was not only George on the elevator. It was his famous cigar on the elevator with him.

Well, I get a violent migraine from cigar smoke. So every time the door opened, I would, of course, pull out my handkerchief, put it on my nose, and hold it over my nose until I got down. Everybody would say, "Do you have a cold?" "Do you have a cold?" "Yes, I have a cold." And then we would get over to the trolley and I would wait to see where he was going to sit, and then I would go to the opposite end, depending on which end the wind was blowing. And sure enough, when we got to this side, of course, we had to get back on the elevator again; and I would pull out my handkerchief, ride on the elevator with the handkerchief over my nose. And everybody would say, "Do you have a cold?" "Do you have a cold?" "Yes, I have a cold."

So they are wonderful memories of George. And he would want us to be

rather light in paying a tribute. Because, of course, as I said, he was a good humored man and it only took a couple of words until he had you laughing.

Mr. Speaker, I yield the balance of my time to the dean, the gentleman from California (Mr. LEWIS).

Mr. LEWIS of California. Mr. Speaker, I thank the gentleman very much for yielding by way of closing this wonderful time we have had together in tribute to our colleague, George Brown.

I mentioned at the beginning of my remarks earlier that George and I, although we had our differences politically from time to time, had so much more in common.

The fact that we often talked about being born on the wrong side of the tracks, he in Imperial County, and I was raised in San Bernardino. But shortly after in his youth, he was in Colton, considered by us, like my home, on the wrong side of the tracks. He and I shared our love and our pride as being alumni of the wonderful university in West Los Angeles, UCLA.

George also had this great passion for science but particularly for NASA. When I had the chance to work with NASA's programming in the VA-HUD subcommittee, George and I professionally spent a lot of time together and many times in the battle here on the floor to save the Space Station and the future work of NASA.

Beyond that, we had a great love for water. I remember George talking about riding in an innertube down the Alamo River where he had his first experience with the Salton Sea and his commitment to that project as a part of his youth but also as a part of his very intense and life-long love for the environment.

George kind of closed his days and my memory of him when Arlene and I went and visited Marta and George at their new home in San Bernardino where they had been there for a while but they built this huge, huge fish pond, the largest fish pond I have ever seen in my life and the first time, and I told friends of this, the first time I ever heard George even raise a doubt about his commitment for the environment.

Because suddenly, and he spent a lot of money for these fish, etc., and they were planning to have tea out there and watch the fish grow; and the birds from the outside began flying in in their natural way, and stealing his fish.

George was a brilliant, wonderful, talented guy and a reflection of the best of America's House, the people's House, the House of Representatives.

I appreciate all of my colleagues joining with us tonight and sharing this evening with Marta and her family.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. LIPINSKI) is recognized for 5 minutes.
